**BASSETT LIVESTOCK AUCTION
BASSETT, NEBRASKA**

ORTON RANCH
Red Angus

Welcome Cattlemen and Women!

Welcome to our 5th Annual Bull and Female Sale!

Time. Time only exists to mankind. If you could ask a dog, cow, horse or a tree what time it is, they would say the time is right now. They live in the NOW. We can all learn something from this.

After two years of drought our cows have proven their genetics correct. With less grass than ever, they made the most of their environment. Weaning weights were up and the cows did not lose condition. They were not supplemented but rotationally grazed and worked for everything they ate. Conception rates remained the same as good grass years. If you want to buy bulls from a cowherd that works for a living you are in the right place!

We cull deeply for udder and foot quality, and especially disposition.

After weaning, the calves are on a high roughage diet during the winter and spring. Come summer they head out to native Sandhills pasture. We rotationally graze them through the fall with the only supplement being a good salt and mineral program. Starting three months before sale day we supplement them with six pounds of a corn/distillers blend and protein to get ready for the sale. What you see is what they really are. They will hold condition during breeding and last longer, breeding more cows over the years. The testimonials speak for themselves.

Each year the bulls get more consistent. Every bull we brought to town is for sale. We will not be bidding against you. Feel free to call with any questions and stop by the ranch to see the cattle any time. May the Lord bless you with a prosperous and healthy new year. We look forward to seeing you on sale day!

The Orton Family
-Daniel, Summer, Cailin, Colten, Kiley, and Clay

E Hwy, Atkinson, NE

Delivery and Loadout:

FREE NATIONWIDE DELIVERY
on bulls.
Bring your trailer to the sale and receive \$100 rebate per bull.

Guarantee:

All bulls have passed a breeding soundness exam in November 2022 and sell as guaranteed breeders. In the event of infertility, a replacement will be made available or a future sale credit will be offered in the amount of the purchase price minus salvage value. To protect your bull from a broken tool, leg, or death it is recommended to purchase livestock insurance. The total cost of the insurance is 11% of the purchase price for bulls under \$10,000 and 12.5% of the purchase price for bulls over \$10,000. Orton Ranch Red Angus will pay half of the percentage while the customer pays the other half. If customer chooses to decline the policy, Orton Ranch has no obligation to cover any losses due to injury or death.

All heifers are guaranteed to be bred on the day of the sale as they will have been checked on Friday, January 13, 2023. They were ultrasound in September 2022 by Dr. Finney. They were all poured with dectomax and vaccinated with Vira-shield 6+VL5.

Insurance:

Insurance will be available on sale day
More info on page 37

Sale Day Bids:

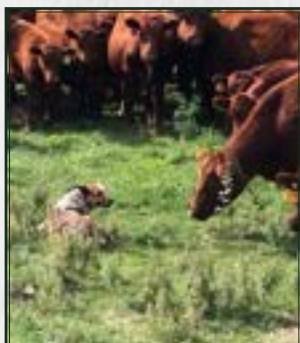

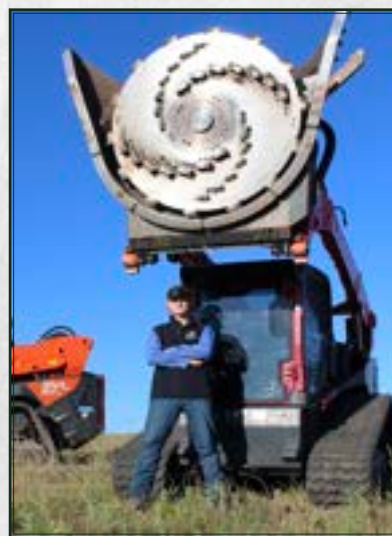

Please call Daniel or Summer for your sale day bids.
Satisfaction guaranteed!

Meet the Crew

Our crew consists of our family, horses and dogs. This brings us great satisfaction knowing we ride for our cattle, our land and our brand. We are proud to offer efficient and quality Red Angus bulls and females, raised by our family for your family!

We lost Clancy this year. He was a tender dog that loved the kids and cows.

The best cat ever! Oreo loved being in the corrals with the cows. We lost him in December and we are so happy to have had him.

Cowherd-Building Traits

"The profitability in our herd is based on the efficiency and longevity of Red Angus females."

Bob Skinner – Skinner Ranches
Jordan Valley, OR

Profit begins with reproduction. Producers who can count on a higher percentage of pregnant heifers will have a larger number of replacements that they can cash crop. The Red Angus **HEIFER PREGNANCY** (HPG) EPD predicts the probability of heifers conceiving to calve at two years of age.

CALVING EASE is a trait of major economic impact. Heifers that experience calving problems require additional labor and are less likely to rebreed. Red Angus completely describes calving ease with Direct (CED) and Maternal (CEM) EPDs.

Annual cowherd feed costs represent producers' largest expense, and simply maintaining the cowherd's body weight and condition accounts for 65-70% of that total. Red Angus' mature cow **MAINTENANCE ENERGY** (ME) EPD arms producers with a tool to help keep feed costs in check. Efficient, easy-fleshing Red Angus replacements help you get a handle on feed expenses and make the most of available forage.

Females that stay in the herd reduce replacement rates....and provide more valuable heifers to sell....a huge economic driver for cow/calf producers. Red Angus customers have the advantage of a **STAYABILITY EPD**, which predicts a bull's ability to sire daughters that remain productive past the age of six.

Rancher Prerequisites

CALM DISPOSITIONS of Red Angus increase profit through easier handling, better conception rates, faster gains, higher USDA quality grade and fewer dark cutters.

RED HIDE COLOR improves **HEAT TOLERANCE** for both southern cowherds and summer feed lots. Additionally, Red Angus have no diluter genes, so you will never get gray calves when Red Angus are mated to Continental cattle.

POLLED and **PIGMENTED** come as standard equipment on Red Angus, and translate to profit by eliminating dehorning stress, and greatly reducing sun-burned udders and cancer eye.

Customer Service & Testimonials

Customer service is of the upmost importance to us. All customers should expect a personal contact with us to ask about their bulls. We want to know how they performed, how they held condition, if their disposition was good. We want to know if they like the calves and how well they grew. We are interested in how our bulls are benefitting you and your operation. We are open to suggestions for improvement and change.

We are happy with the feedback we've gotten from three previous sales.

"Orton Ranch Red Angus bulls definitely are top notch!! Nice - calm quiet bulls!!!"

-Houston, H., Nebraska

"We had been looking to improve profitability on our farm by adding more efficient, easy fleshing genetics. We have found that with the Orton Ranch Red Angus cattle that they spend half the time at the round bale feeder as our other cows do and maintain great body condition. Calving ease has greatly improved along with maternal traits. 2022 has been our best calf crop and it looks like it's just going to keep getting better. Thank you Daniel for your candid advise and outstanding customer service."

-Jason W., Michigan

"I purchased a bull from Orton Ranch Red Angus about 4 years ago. He has been a great bull. All of my cows have been bred every year and he has produced some of the best looking calves I have ever had. The bull is very calm and very easy to work with. I would definitely buy another bull from the Orton's again."

-Shane S., Idaho

"Preg checked cows yesterday with only one open out of 40, your bull did a great job. Very pleased."

-Derek C., Nebraska

"I believe these bulls are making a low maintenance cow that can thrive in any environment. We are also really pleased with the calf crop this year. The heifers are awesome, and the steers are doing well on feed."

-Zach W., Nevada

"Purchased bull via DVAuction-Very pleased! Delivered to my farm 1000 miles away. I look forward to my next bull from Orton Ranch Red Angus."

-Alex P., Michigan

"The bulls are great! Not overfed so it's easy to see how they perform from birth to yearling. They hold up great!"

-Michael R., Idaho

"We have purchased bulls from Daniel and Summer the last 3 years and have been very pleased with the quality these bulls brought to our operation. Despite extreme drought, these bulls have stayed fleshed up with no maintenance. Not only are these bulls backed by power and genetics, they are extremely gentle to be around and work with. We appreciate the hard work and dedication from the Orton family to bring top bulls in to the industry!"

-Trevor & Cicely E., Idaho

"He held up well. We had him with 16 first calf heifers and 8 virgin heifers and they were all pregnant when we checked them. Plus, he still had plenty of condition on him. Disposition with him and the heifers has been good also."

-Derek B., Iowa

"Your bull did great this summer. Really traveled well and was a very active breeder."

-Randall S., Montana

"I can't believe how gentle these bulls are."

-Joe L., Bassett Livestock

Your kiddos and the ranch are why we buy from you, along with the fact that these bulls are top notch. I want to support ranches with young ones so they can have nice things while learning how rewarding ranch life is. We are so happy that there are still ranches for kiddos that love working and seeing animals grow while making a living. God bless!"

-Charla S., Nebraska

"Hello there, they are doing good, they have filled out quite nice!"

-Brian & Jessica N., New York

"Preg checked earlier this month. Your two bulls were 100% on 39 cows and 12 heifers. They couldn't have done any better."

-Adam W., Illinois

Philosophy

We are developing a program that emphasizes slow, natural development and focuses on maternal, moderate, and easy fleshing traits. Replacement heifers are chosen based on how they breed up in their cycles, size, fleshing ability, and overall visual confirmation. In our environment, harder doing cows naturally fall out of the herd.

Bull Development

“A Different Kind of Test”

Our coming two year old bulls are grown slowly and naturally so they maintain condition during breeding season and won't fall apart on you. They will also breed more cows over their lifetime. These bulls develop through a different kind of “test” or selection process. As yearlings they spend the summer on native Sandhills grass. Three months before the sale they receive 6 pounds of a corn distillers mix alongside pasture and free choice native grass hay. All bulls in the sale have passed breeding soundness tests and are easy fleshing.

Females

We are very proud of our mother cows for all we expect and require of them during the year. We run our cattle in thick, steep canyon pastures, so structural correctness and good feet are a must. Mother is expected to make the most of her environment traveling the canyons while maintaining her condition, raising a good calf, and breeding back. These cows are efficient, deep bodied and there's not a mean one in the bunch!

Our cows are bred to be easy fleshing and are managed that way. They go to work everyday without pampering. We run them the same way we ran our commercial herd. If they are open in the fall, raised a bad calf, or are poor doing, they get culled.

OCC, Beckton, 5L, PCC, and Ozark Hills genetics are working very well for us in the Sandhills and also for our customers throughout the country. Not only are they nice to look at and gentle, but they are moderately framed, easy fleshing and stacked with strong maternal qualities.

Kelly Bruns used to say, “It's all about the mamma cow!” We agree.

THANK YOU TO OUR CUSTOMERS!

Johann Zietsman said after seeing this bull... "This is the best bull in the Red Angus breed that I have ever seen." After watching Hobo's video you will see what a stud this bull is. One of our best friends managed the ranch that Rick Marshall owned south of Ainsworth, Nebraska where Kaycee Hobo called home and we had the opportunity to see him in person. He was never pampered and he stayed fat all year round on less than desirable grass. We are extremely pleased with all of the calves we are getting from this bull.

Mr. Sandman is one of the best 84S sons that we've ever seen! He's truly a Sandhills bull... moderate, easy fleshing, and thick. He's a true "herd builder" bull that sires smooth deep bodied sons and daughters. We've owned him now for 5 years and originally was used on our commercial cows that we owned prior to purchasing the Bruns Red Angus herd. We could see year after year the improvement that he made in our replacement heifers and steers. He has proved himself a breeder that has a great disposition, is structurally correct and has a very high libido.

 Guts! Guts! Guts! This powerful Magnum son gets the "BIG GUT" award! He will stamp your calves with thickness and pounds!

Docility Matters!

There are different ways to measure disposition throughout the cattle industry but overall it is all about the relative docility and handling ability of animals during processing in a working facility. We take the time to run each bull inbetween us, down the alley in order to assign them a score.

A bull with no issues, that is quiet, will receive a score of 3 stars. Any bull who shows a little nervousness is dropped down to 2.5 stars. Anything with a little more hesitation will receive a 2 star score. We care about disposition at Orton Ranch Red Angus and stand by our goal of only offering you easy handling cattle.

MARTIN-TRUDEAU INSURANCE

LIVESTOCK DIVISION

• Livestock insurance endorsed by the South Dakota Angus Association and the South Dakota Simmental Association •

LIVESTOCK INSURANCE

Orton Ranch Red Angus will pay 1/2 of the insurance premium.

Mortality + Accident Coverage (11% of purchase price) for bulls under \$10,000
Mortality + Accident Coverage (12.5% of purchase price) for bulls over \$10,000

- * Death- 100% of purchase price returned to you.
- * Broken leg- 100% of purchase price returned to you after bull is put down.
- * Broken tool- 80% of purchase price returned to you minus salvage value.

Sale Terms & Conditions

1. BIDDING

The Auctioneer in charge will settle any disputes as to bids, and his decision on such matters shall be final.

2. TERMS

Terms of sale are cash unless satisfactory credit arrangements have been made with Sale Management prior to sale.

3. PURCHASER'S RISK

Each animal becomes the risk of the Buyer as soon as sold, but it shall be the obligation of the Seller to see that animals are fed and cared for free of charge to Buyer, until loaded for shipment or until the expiration of 48 hours after the sale, whichever occurs sooner.

4. CERTIFICATE OF REGISTRY

A transferred certificate of registry will be furnished to the Buyer for each animal.

5. HEALTH

All animals are eligible for interstate shipment, except as otherwise announced. Interstate health papers will be furnished for each animal in accordance with prevailing State/Federal Regulations.

6. ANNOUNCEMENTS

Announcements from the auction block shall take precedence over the sale catalog and/or any additional information printed regarding the animal(s) sold.

7. LIABILITY

All persons who attend the sale do so at their own risk. The seller, auction facility, and sale manager assume no liability for any accidents or losses that may occur.

8. CONTRACT

The above terms and conditions of the sale shall constitute a contract between the buyer and seller of each animal and shall be equally binding upon both. Each sale or resale of an animal constitute a separate transaction.

Red Angus Guide to EPDS and Indexes

ProS... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

Tribute to Jackie Dee Orton

Jackie Dee Orton

October 2, 1937-November 24, 2022

My dad passed away on Thanksgiving morning which was a special day because it allowed me to contemplate the gratitude that I have for my good parents. It brings great peace knowing that he is no longer in pain and that he has reunited with my mother. And above all my father lived a devoted life to his Father in Heaven and his Savior Jesus Christ. He loved the scriptures and enjoyed teaching from them. Dad lived most of his life in Utah. He always loved coming out to Nebraska to be on the ranch and help brand the calves. I had the opportunity to speak at his funeral and I joked that he and I had consumed more biscuits and gravy together than any two other human beings in the history of the earth. He always enjoyed making a loaf of bread in the kitchen or being outside working on a woodworking project.

He will be greatly missed and I will always be grateful for his example of faith and dedication to things spiritual. We would like to dedicate our 5th bull sale to him.
